Projects

*Digital Hotel Management system :-

The system features QR code-based table scanning for quick product details and seamless check-ins, a responsive admin dashboard with visual analytics for bookings, revenue, and inventory, an automated billing module with downloadable invoices, and secure role-based access for Admin, Receptionist, and Customers.

*Hospital Management system:-

Developed a responsive Hospital Management System featuring a dynamic admin panel that enables real-time content management across all web pages. The system allows users to book doctor-wise appointments and provides administrators with a graphical dashboard to monitor total, pending, and completed appointments efficiently.

***Job Portal:-** A user-friendly job portal with role-based access, allowing employers to post and manage jobs while employees can search, save, and apply easily. It includes a responsive dashboard, automated application tracking, and smooth job management for an efficient hiring experience.
